# THE COMPANY PROFILE

# ABOUT US

DIL Fire and Safety Services company is a duly registered entity with the government of Kenya, specializing in the provision of fire and safety related products and services, that range from sale and installation of all kinds of fire protection equipment to comprehensive training in the statutory safety courses. We also carry out both fire safety and safety & health audits to companies and institutions in addition to servicing and maintenance of fire protection equipment, among others.

DIL Fire and Safety services boasts of several years experience in the provision of quality, client-oriented services, to the satisfaction and commendation of our clients.

# PROBLEM

DIL Fire and Safety Services recognizes that most workplaces are often faced with problems that include:

- Unexpected eruption of fires, that are recurrent, and which when poorly or untimely responded to, result in costly losses.
- Unavailability of the relevant fire protection equipment to meet the fire at the right time and control it.
- Absence of or low trained personnel to handle fire and safety emergencies, together with the resultant injuries.
- Unaudited or unprofessionally audited work premise that expose the occupants to numerous hazards, and that further attract incompliance penalties with the government regulatory bodies.
- A general lack of preparedness in most staffs in the event of a real emergency. This is usually vividly observed in the staffs' lack of knowledge on the company's evacuation plan

# SOLUTION

As a solution, DIL Fire and Safety Services is committed to partnering with companies and institutions to:

- Provide professional advice/ consultancy on the proper fire and safety measures to adopt.
- Provide products that are guaranteed to control fire and safety emergencies
- Provide services geared towards capacity building and empowerment of personnel to meet fire and safety challenges.
- Assist the companies and institutions become compliant in all the statutory fire and safety requirements.

# FIRE EQUIPMENT

## II. EQUIPMENT INSPECTION

A regular inspection of the fire protection equipment is critical in ensuring that the equipment are in a serviceable condition and won't fail when they are needed for use. DIL Fire and Safety Services uses professionally trained personnel to conduct timely inspection of the fire equipment, and upholding DOSH approved standards.

In addition, we also provide comprehensive reports and certificates for the inspections, to foster accountability, compliance and quick action.

# FIRE EQUIPMENT

## III. REFILL AND REPLACEMENTS

DIL Fire and Safety Services possesses expertise, through its experienced personnel, to refill used or depleted fire equipment (such as extinguishers) and further to replace those that are, or have parts that are, faulty and need urgent attention.

We aim to work with a short turnaround time in refilling and replacements in order to secure our clients against fire and safety emergencies.

## II. TRAININGS

### 1. FIRE SAFETY

DIL Fire and Safety Services provides fire safety training in the following:

- Fire awareness- a one-day course highlighting the basics of fire control using the common fire equipment.
- Fire Marshal- a 3-4 days comprehensive course on the essentials of fighting fires, customized to the clients needs and with special focus on the available equipment within the work premise.

# TRAININGS

## 2. FIRST AID

Provision of initial medical care at workplaces is of paramount importance as it could be the determinant between life and death. Hence, DIL Fire and Safety Services trains:

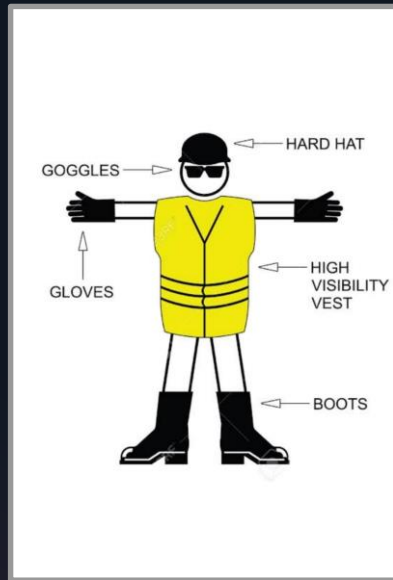

- ❑ **Basic First Aid**- a one-day course exploring the care to give to common injuries or medical conditions.
- ❑ **Occupational First Aid**- a 3-4 days comprehensive course focusing on workplace injuries and medical conditions and the care to provide in such cases.

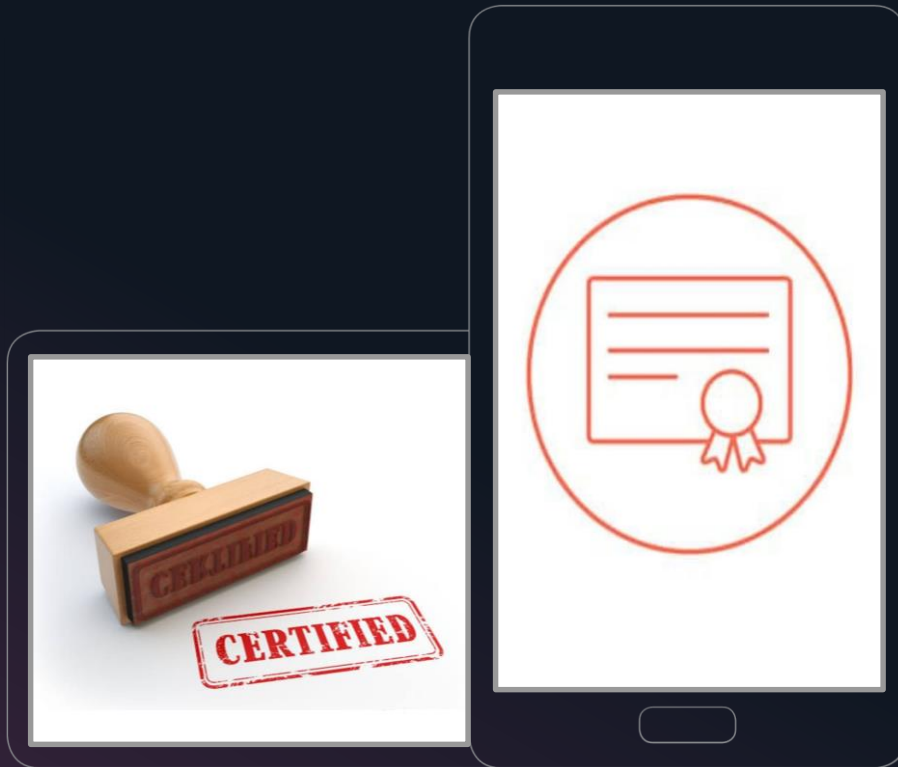

# TRAININGS

## 3. OCCUPATIONAL SAFETY AND HEALTH

DIL Fire and Safety Services also trains occupational safety and health in workplaces. This follows the Directorate of Safety and Health (DOSH) standards and aims at empowering the workplaces Safety and Health Committee members identify, manage and control all workplace safety and health hazards. The course duration is 3-4 days

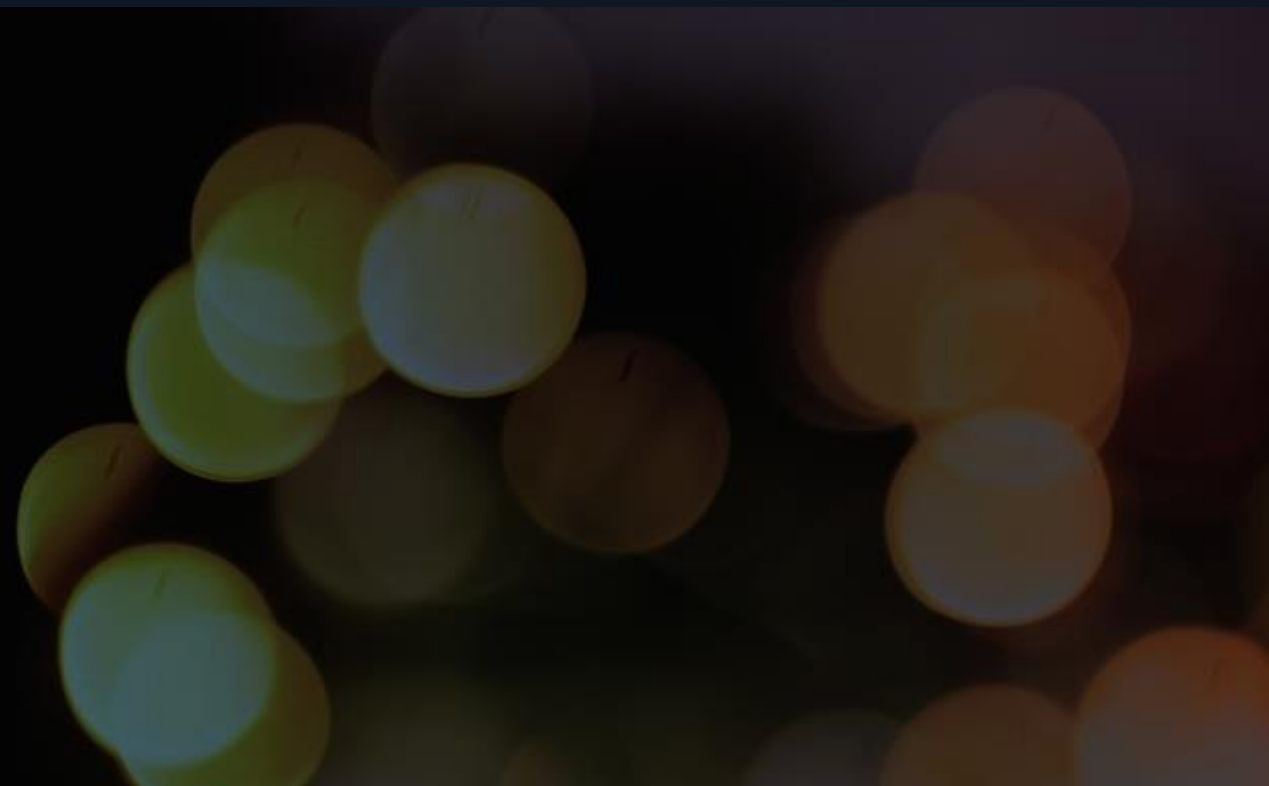

# TRAININGS

## CERTIFICATION AND REFRESHERS

Upon successful completion of the short courses trained under DIL Fire and Safety Services, the trainees are issued with duly signed and sealed certificates of course completion. A compliance certificate for the company or institution is also issued.

As technology progresses, as hazards increase, and as forgetfulness attend the disuse of skills, there develops a need for **course refresher trainings**. This aims at updating the clients with new and more efficient technologies in fire protection and safety, increasing clients' capacity to manage cropping hazards and sharpening clients' skills in fire protection and occupational safety.

## III. AUDITS

### STATUTORY AUDITS

Through our DOSH Approved auditors, DIL Fire and Safety Services carries out regular audits in the following:

- i. Fire safety
- ii. Safety and Health

Upon completion, DIL Fire and Safety Services ensures that both the client and DOSH are served with a copy of the comprehensive, duly signed and stamped audit reports.

DIL Fire and Safety Services further offers consultancy services in matters fire safety and occupational safety and health.

## IV. EMERGENCY DRILLS

### FIRE DRILLS

In a bid to capacity build client companies, institutions and their occupants become more prepared for real emergency situations, DIL Fire and Safety Services collaboratively organize and oversee the conduction of emergency fire drills. This is done under well-controlled environment and in close engagement with the relevant stakeholders in such emergencies.

Moreover, DIL Fire and Safety Services assists companies and institutions to develop practical environment-conscious emergency evacuation plans.
